### FBI IT Triple-S

To address numerous FBI and DOJ IT programs and projects of varying scope and complexity annually, the FBI IT Triple-S basic ordering agreement (BOA) will provide coordination and uniformity in the FBI and other DOJ agencies' IT acquisition process. The BOA simplifies ordering of IT services with pre-qualified vendors while reducing procurement lead time and the cost of preparing and reviewing proposals.

FBI IT Triple-S is available for use throughout DOJ, offering various features and benefits.

FBI IT Triple-S Features	Benefits
Supports a \$30 billion ceiling with a maximum order of \$50 million over 8 years under a single task order request (TOR)	Robust program activity facilitates growing participation, continuously increasing high quality available resources
Offers a 1-year base period plus 7 optional exercisable 1-year periods	Enables long-term planning of large-scale program requirements
Contract types include firm fixed-price (FFP) and time-and-materials (T&M)	Contract type options ensure best use of budgetary resources
Task orders (TO) and/or delivery orders (DO) issued under this basic ordering agreement (BOA) may be performance based	Allows for flexibility to have incentives and disincentives incorporated
No fee to DOJ customers, and task orders awarded within 2-months	Reduces acquisition costs and lead time
Access to vetted small businesses; 52% of the 46 prime contractors are small businesses	Task orders awarded to small businesses can help toward agency small business goals

## Executing Excellence On-Time and On-Budget

The FBI prides itself on delivering the highest caliber of national security to protect American citizens. By devoting a similar depth of detail, commitment, and pride to that of FBI employees, Phacil personnel continually deliver optimal IT support and solutions to US Civilian and Defense agencies. Phacil will design, engineer, and implement comprehensive solutions using quality best practices and approaches based on CMMI, ITIL, IEEE, and ISO 20000. The Company has a proven and demonstrable track record that will always fulfill the FBI's mission of Anytime, Anywhere, On-Time, On-Budget.

## Team Phacil Partners

Keeping up with the wide range of potential technical tasks and FBI IT Triple-S requirements necessitates a teaming strategy. The team we built is the best of the best. Mid-sized, manageable, and highly responsive, our synergistic group has broad and highly relevant expertise across the BOA. To ensure seamless transitions onto task orders (TOs), Phacil establishes quality, cost, and schedule controls for key requirements. We will provide a qualified team of employees on Day 1 that reflects TO-specific expertise, capabilities, and experience necessitated by the individual TO Request.
